**Subject:** The role of this Scientific Advisory Board (SAB) is upon request of PM USA to assess the adequacy, quality, and quantity of the tests performed by Philip Morris in order to confirm the validity of the data relied on by Philip Morris to evaluate the chara

Kevin,

The attached file contains what I believe is the final version of the SAB charter. The changes from the version that you have previously reviewed are fairly small. As we had discussed the plan is to attach this charter to the contract of each SAB member as a means of describing, in part, the scope of the work covered by that contract. I think the other part of the scope is general consulting to PM on an individual basis if requested by PM. Valerie King has been working to put some of this together on our side; if you don't have any changes please let her know that this can be used as an attachment to the contract.

Thanks,  
George
